

Questionnaire for the early diagnosis of neuropathy

Dear patient,

Neuropathy is nerve damage that can occur in patients with cancer as a result of the illness itself, but also as a consequence of taking certain medications. By completing this questionnaire you are helping your doctor to detect possible nerve damage at an early stage and to take this into consideration accordingly in your treatment decisions.

Please mark as appropriate!

YES	NO	General wellbeing
------------	-----------	--------------------------

<input type="checkbox"/>	<input type="checkbox"/>	Good?
--------------------------	--------------------------	-------

Discomfort in the hands and/or feet

<input type="checkbox"/>	<input type="checkbox"/>	Tingling, burning, prickling („pins and needles“)
--------------------------	--------------------------	---------------------------------------------------
